

Report of the TC-AF meeting held in conjunction with the AES 134th Convention in Rome, Italy, May 5th 2013.

Attendees

Vlado Delic	University of Navisad, Serbia	vdelic@uns.ac.rs
Christoph Musialik	Algorithmix	cmm@algorithmix.com
Eddy B. Brixen	EBB-consult	ebb@ebb-consult.com

The meeting was convened by vice chair Eddy B. Brixen.

1 Presentation attendees / attendees list

The vice chair welcomed the new member Vlado Delic by giving an introduction to the tasks of the TC-AF.

2 Minutes of the last meeting

The minutes were not available.

3 Status on the AES Audio Forensics Conference

The next conference will take place in London, UK, June 12-14 2014. Due date for full paper submission is January 31, 2014.

4 Proposal for upcoming conventions

It was discussed how to improve the understanding, application, and interpretation of signal analysis and signal processing in audio forensics. It was suggested that tutorials would be a way to provide applicable knowledge to many not just in audio forensics. For instance many audio engineers would benefit from better understanding of the FFT.

Two titles for tutorials suited for convention attendees came up:

Proposal 1: Dos and don'ts in signal processing for audio forensics.
For this Josh Reiss was mentioned as one possible presenter.

And due to the fact that bit compressed signals are being treated as linear audio:

Proposal 2: Codec Schemes Tutorial for the audio forensics engineer

5 Emerging trends

No specific topic mentioned.

6 Other business

No other business.
