

Minutes TC ARDL Meeting 137th AES Conventiom Los Angeles, USA

Francis Rumsey, David Ackermann, Nadja Wallaszkovits, Brad Mc Coy, Konrad Strauss, Nicolas Bergh,

1)

AES and IASA

IASA should actively ask AES to make the guideline documents standards or at least **technical documents**

Would bring it into the AES committee level

Recording and production technical committee has done the same thing with the Grammy documents – reissue as an AES technical document banner

Does IASA want AES to make this AES documents?

2)

Website: Become more active, fill it with contents, eg. links to useful resources from workshop W4

David Ackerman will edit the page, we will work on it during the conference

3)

Proposal for a conference on archiving: 70 delegates needed (50 paying =point of break even) 2018???

Joint promotion through other organisations e.g. IASA, AMIA, ARSC (something like JTS, but under the organisation of AES)

Hands on training

Archive workflow design – how to preserve digital data

Trusted digital repositories, small scale digital storage systems design

Training oriented conference could be earlier

Archiving conference in Mexico – big issue there! Technical topics etc.

Form a conference organising team

Use the reflector for spreading information
