

Meeting TC-MA 22.05.2017, 13:00h during the AES Convention Berlin

Participants:

- Helmut Wittek, SCHOEPS, chair
- Eddy Brixen, ebb consult
- Hans van Maanen, Temporal Coherence
- Per Sjösten, VP Northern Europe

Agenda:

1. Workshop „Mic Specs“
We discussed whether this Workshop should be better a series of tutorials, so that the educational character of the event is better represented. The workshop on the succeeding day was actually well perceived and well attended by the audience, so maybe there's no need to change that now? Open to discussion. Wittek will find out which other implications such a change of name would have (e.g. free access?)
2. „Emerging trends“
There is a little text that the committee is to write to the TC in a 2-yearly rhythm. This is overdue, actually the last report on Emerging trends we missed. We'll send out a mail to the TCMA reflector to gather feedback.
3. Discussion: "Time behaviour" again discussed by H.v. Maanen. Committee invited him to ask on the reflector for a discussion or to gather actually more research data, as the claims seem not reflected by known research data.
4. Conference on „Microphone technology“. This plan was formerly withdrawn by E.Brixen, as he hadn't gathered enough research papers on that topic. Future plans will take this into account.

Helmut Wittek, 23.05.2017
